## EXPERIENCE

### EGT Digital — Front-End Developer

*Sep 2024 - Feb 2026*

- Engineered dynamic player retention tools and gamification features, including a real-time progress-tracking quest system and automated rewards using complex, sequenced state-driven logic.
- Developed and maintained high-performance promotional campaigns and popup features deployed across prominent regional betting platforms, including Inbet, Winbet, Sesame, Bethub, etc.
- Optimized animation performance by strictly leveraging high-performance CSS properties (transforms, opacity) instead of layout-triggering properties (width, margin), ensuring smooth 60 FPS rendering and preventing layout shifts.
- Optimized mobile web performance via a mobile-first approach, employing media queries to dynamically serve responsive lower-resolution asset variants, significantly reducing data overhead.
- Served all visual assets through a CDN to ensure edge-caching minimized loading times and Time to First Byte (TTFB) for players
- Designed data-integrity fallback flows by implementing network synchronization listeners and server-side state verification, ensuring the UI gracefully rolls back to the last verified server state upon network disconnections.

### DEVEXPERTS — Front-End Developer

*Jan 2023 - May 2024*

- Utilized React and TypeScript to develop high-quality features, refactoring legacy components to enhance overall codebase quality, speed, and maintainability.
- Actively participated in peer code reviews, providing constructive feedback on pull requests to contribute to the team's high coding standards.
- Ensured comprehensive test coverage by implementing unit tests in Jest and participating in end-to-end (E2E) testing with Cypress to validate critical user flows.
- Collaborated closely within an Agile environment with cross-functional teams including Backend, Quality Assurance, Business Analysts, and Designers to clarify functional requirements.
- Maintained detailed Storybook representations of UI components to streamline visual reviews for designers, ensuring flawless alignment with Figma mockups.
- Maintained product stability by resolving reported bugs in Jira, creating detailed tickets for undocumented edge cases, and updating clients on technical adjustments.
- Promoted web accessibility (a11y) standards by utilizing semantic HTML, enabling keyboard navigation/focus, and verifying screen-reader compatibility.

### Aiopsgroup — Web Development Internship

*Aug 2022 - Oct 2022*

- Mastered core frontend concepts and applied foundational skills in HTML, CSS/SCSS, JavaScript, and Git.
- Worked with React, TypeScript, and Salesforce Commerce Cloud architectures (SFRA and PWA Kit) to build modern e-commerce interface features.

### Endava — React Typescript Internship

*Feb 2022 - Apr 2022*

- Worked in close Agile collaboration with engineering teams to map frontend project modules.
- Used React and TypeScript to implement client features and enhancements based on technical project requirements.

### Freelance Graphic/Web Design and Illustration

*2016 - 2020*

- Honed digital design proficiency through diverse freelance projects, crafting digital artwork, corporate logos, and website layouts using Figma, Illustrator, and Photoshop.

### Alfa PMV — Graphic Designer

*Mar 2014 - Jul 2015*

- Crafted marketing assets and digital visual layouts according to established branding guidelines.

## PROGRAMMING SKILLS

**Languages:**
HTML, CSS (SCSS, Less, CSS Modules), JavaScript, TypeScript, Node.js

**Libraries & Frameworks:**
React JS/TS, React Router, Redux Toolkit, RxJs, Styled Components, Framer Motion, Stylex, Jest, Cypress, Tailwind CSS, Bootstrap Material UI, SFRA & PWA Kit (Salesforce)

**Tools & Version Control:**
Git, Bitbucket, Jira, Azure Devops

**UI Development & Debugging:**
Storybook, Chrome DevTools, React Developer Tools

**Graphic Design:**
Figma, Illustrator, Photoshop

## SOFT SKILLS

Effective Communication, Empathy, Teamwork, Creativity, Sense of urgency

## CERTIFICATES & COURSES

- The Ultimate React Course 2024 — Udemy
- Web Developer — Aiopsgroup (2022)
- Front-End Developer — Endava (2022)

## EDUCATION

Software University (SoftUni)
*May 2019 - Jul 2020*

## LANGUAGES

**Bulgarian** — Mother tongue
**English** — Fluent comprehension, (B2 Speaking / Writing)
